

THE SMART AUTOMATION CERTIFICATION ALLIANCE
IS LOOKING FOR PILOT SITES FOR

INDUSTRY 4.0 CERTIFICATIONS

Gain first access to state-of-the-industry developed and validated skills standards with online and hands-on assessments

Students can earn Industry 4.0 Automation Specialist credentials for skills you're currently teaching!

- Electrical Systems
- Electric Motor Control
- Variable Frequency Drives
- Motor Control Troubleshooting
- Sensor Logic Systems
- Electrical System Installation
- Programmable Controllers
- Pneumatics
- Mechanical Power

Why be a pilot test site? 

- Contribute to the nationally-recognized Smart Automation Industry 4.0 certification process
- Receive national PR and be seen as a leader in workforce education and training
- Market your program as cutting-edge of industrial certifications to local industry partners
- Receive feedback on student performance
- Testing is free for pilot programs!

About SACA

The Smart Automation Certification Alliance is a non-profit foundation supported by industry with the goal of creating a larger number of individuals with certified Industry 4.0 skills. SACA certifications address the integration of manufacturing competencies with Industry 4.0 technologies, like smart sensors, connected systems, networks, data analytics and smart devices.

To register as a SACA Certification Pilot Test site, contact ATS at (313) 909-0749 or visit atsmich.com
